## Guideline values for tightening torques

DIN 267*		3.6	4.6	4.8	5.8	8.8	10.9	12.9
Bolt	Socket size	Torque Nm						
M1,6	-	0,05	0,065	0,086	0,11	0,17	0,24	0,29
M2	-	0,10	0,13	0,17	0,22	0,35	0,49	0,58
M2,2	-	0,13	0,017	0,23	0,29	0,46	0,64	0,77
M2,5	-	0,20	0,26	0,35	0,44	0,70	0,98	1,20
M3	-	0,35	0,46	0,61	0,77	1,20	1,70	2,10
M3,5	-	0,55	0,73	0,97	1,20	1,90	2,70	3,30
M4	7	0,85	1,1	1,5	1,9	2,9	4,1	4,9
M5	9	1,7	2,2	3,0	3,7	6	8,5	10
M6	10	2,9	3,9	5,1	6,4	10	14	17
M8	13	7	9,3	12	16	25	35	41
M10	17	14	19	25	31	49	69	83
M12	19	24	32	43	54	86	120	145
M14	22	39	51	68	86	135	190	230
M16	24	59	79	105	130	210	295	355
M18	27	81	110	145	180	290	405	485
M20	30	115	155	205	255	410	580	690
M22	32	155	205	275	345	550	780	930
M24	36	265	200	350	440	710	1000	1200
M27	41	295	390	520	650	1050	1500	1800
M30	46	395	530	710	880	1450	2000	2400
M33	50	540	720	960	1200	1900	2700	3250
M36	55	690	920	1250	1550	2450	3450	4150

\* These torque values are only guide lines and are calculated with friction factor 0,125.

## Ecology

The tools are innovatively designed, paying the highest attention to the environment and its safeguard.

All the components are easy to dispose of, because they are built with recyclable materials. Therefore they do not present any danger in terms of environmental pollution.

Models with automatic air shut-off reduce the cycle time and therefore the compressed air consumption.

# Joint Quality

## Yokota

Yokota Industrial Co. Ltd. (Japan) is making great effort to provide high quality and performance airtools for all industries. The modern technology is resulting in a high quality production system, based on 70 years of experience. The company is internationally orientated and active in global sales. The production of the Yokota air-tools meet the demands of the 21th century. All developments are based on original and flexible ideas. The Yokota strategy is that development with team spirit, flexible ideas and young power will bring the best solutions. With all this research and developments Yokota is contributing to a better environment for the operator.

### Advantages of the Yokota Impulse Wrenches: Joint Quality

## Faster

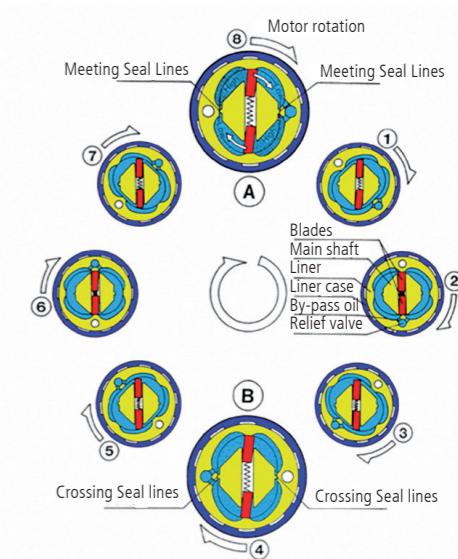

Yokota impulse wrenches are widely used for tightening jobs in the assembly industry, where accurate torque tolerances are necessary. Impulse tools are light, powerful, small and very importantly, have no kick-back. The Yokota range of impulse tools is increasing fast, starting at 6 Nm to tighten small joints, and goes up to 600 Nm. Evaluation of tightening processes in car assembly shows that tightening joints uses 10% of the total assembly time. Working with faster tools therefore can speed up assembly lines substantially.

## High accuracy

Product liability is essential to carmakers. All tightened joints have to be correct. For this reason critical joints must be counted, documented and, of course, tightened with the right clamping force. In order to do this, you need an impulse wrench (with a built-in transducer) connected to a controller. This system ensures that only OK joints are counted resulting in "Zero Fault Production". This fail-safe system fits perfectly in the **Poka Yoke Strategy**.

## High repeatability

Impulse wrenches have a twin blade impulse mechanism for sealing oil which gives a high repeatability. The mechanism is designed so that the liner, rotated by the air motor gives an equal torque on both blades and instant rotation torque on the mainshaft (see figure below). A by-pass is designed in the liner so that the oil can escape from the area of high pressure to the area of low pressure at the moment of creating a pulse and the amount of oil flow can be adjusted by the relief valve to control the torque output. Depending on model and setting, the impulse wrenches give 10 - 40 impulses per second. The power is transmitted by oil pressure and therefore the impulse wrenches have a very low noise- and vibration level.

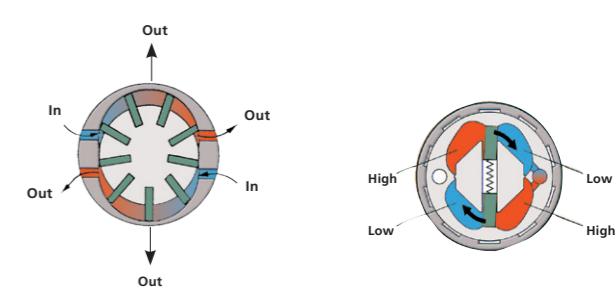

## Double chamber air motor

The Yokota Y-, YLa, YLT, YED- and TKa-series impulse wrenches with double chamber air motor reach the required torque very quickly. The tools have a high number of impulses per second, and therefore very accurate torques can be realized, resulting in increased production speed.

Patented twin blade impulse unit. Yokota's unique impulse mechanism reduces noise and vibration!

### High impulse frequency.

# How to use

## Specified torque range

The specified torque range is measured in the laboratory under standard conditions. Therefore these torque figures are only to be used as a guidance.

The actual torque range is depending on a variety of working conditions, eg: air pressure, joint hardness, used accessory.

The torque ranges are specified at a dynamic air pressure of 0.6 MPa, lower air pressure will result in lower torque. Please take note that these impulse wrenches are developed for a dynamic air pressure of 0.63 MPa maximum.

## Shut-off impulse wrenches selection:

- Hard joint: torque levels up to 100% of the specified torque range
- Soft joint: torque levels up to 90% of the specified torque range

## Non shut-off impulse wrenches selection:

- Hard joint: torque levels up to 95% of the specified torque range
- Soft joint: torque levels up to 85% of the specified torque range

## Accessories:

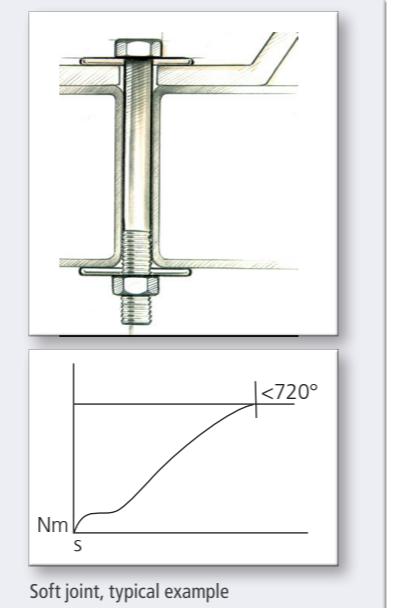

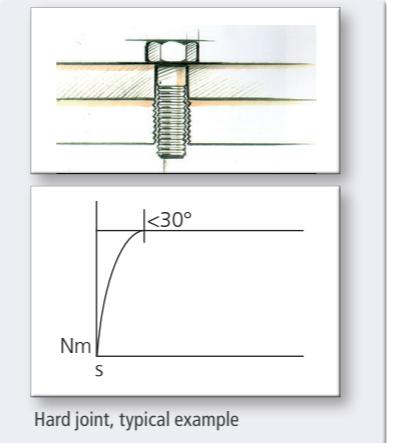

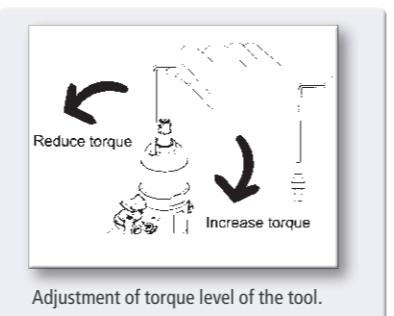

The size and shape of impact sockets influence the torque result.

Extension bars, depending on the length, can lower the torque range with 5-30% Inner torx and inner hexagon can lower the torque range with 5-20%

## For the best result of the impulse wrench, use:

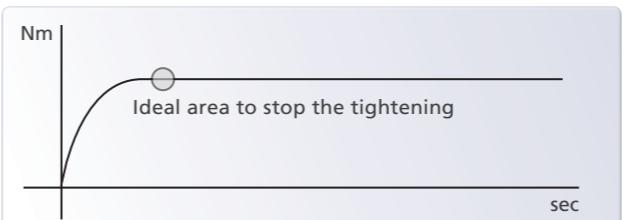

- Constant stabilized air pressure
- Sleeve drive sockets, impact quality (see pages 20-25)
- Impact quality accessories with the correct dimensions
- Accessories in good condition
- Correct hose inner diameter and length
- Lubricated air

We advise to use the impulse wrench up to 80% of its capacity for the highest productivity, accuracy and durability.

# What to choose?

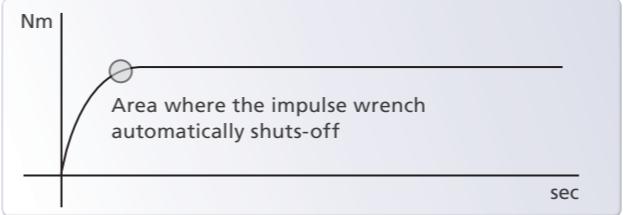

## Impulse wrenches without shut-off

Impulse wrenches archive the highest quality joint if the tightening is finished in this area (horizontal part of the torque curve)

- Highest clamp force with smallest tolerances
- Smallest torque tolerances

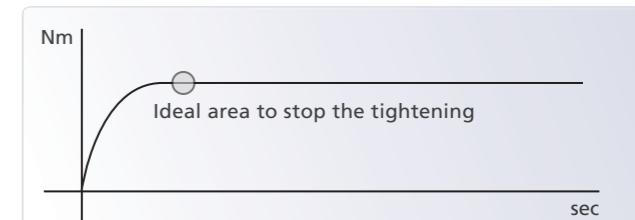

## Impulse Wrenches with mechanical shut-off

### Mechanical shut-off

- Shorter operating time
- Operator knows when the tightening is finished
- Highest clampforce with smallest tolerances
- Smallest torque tolerances

## Impulse Wrenches with Poka Yoke<sup>+</sup> system

### Impulse wrench with controlled shut-off

- Highest clamp force with smallest tolerances
- Smallest torque tolerances
- Shortest optimum operating time
- Operator knows when the tightening is finished
- Operator is informed about OK-NOK of the tightening
- OK joints are counted, no missed tightnings

### Optional on TKa System Wrenches:

integrated LED status-signal:

- Green = OK • Red = not OK

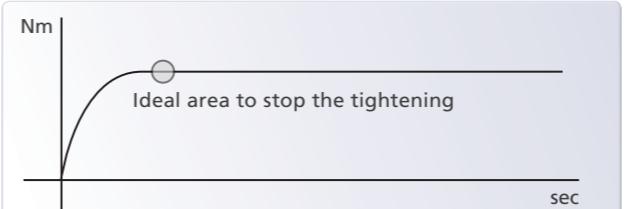

Visible from every angle: left, right, from top and behind.

### The transducer for the YEX, YED and TKa

The strain gauges are positioned on the main shaft, picking up the twisting torque on the main shaft at each impulse as close as possible to the socket. The electric signals are transmitted by induction through the internal- and external coils. Due to this principle the Yokota transducer is very reliable, accurate and without wear.

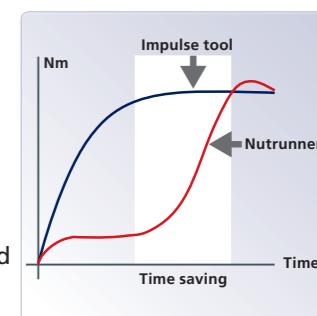

## Impulse Wrenches with integrated torque transducer

### Impulse wrench with torque transducer integrated

- Highest clamp force with smallest tolerances
- Smallest torque tolerances
- Shortest optimum operating time
- Operator knows when the tightening is finished
- Operator is informed about OK-NOK of the tightening
- OK joints are counted, no missed tightnings
- Actual tightening torque is measured
- Full documentation
- Zero fault production

### \* Torque specifications

All specified torques are measured on the Yokota testers, series YET, at a dynamic airpressure of 0.63MPa. The Yokota testers have a static transducer, the specified torques are therefore to be used as a guidance only. In general the torque range will be lower in case of using lower airpressure, extension bars, torx or hexagon inset sockets, soft joints, etc.

# YX serie: Non shut-off

### \* Torque specifications

All specified torques are measured on the Yokota testers, series YET, at a dynamic airpressure of 0.63MPa. The Yokota testers have a static transducer, the specified torques are therefore to be used as a guidance only. In general the torque range will be lower in case of using lower airpressure, extension bars, torx or hexagon inset sockets, soft joints, etc.

Rubber protection covers for all Y-series impulse wrenches are included in the box.

Accessories for impulse wrenches on pages 18 & 19.

# YX serie: Non shut-off

- FEATURES YBX-600T/800T**
- Very high accuracy
  - Electronically controlled shut-off OK/NOK LED on display
  - Counting function
  - No kick-back
  - Maintenance free motor (brushless)
  - Lithium-ion battery, sliding model
  - Perfectly balanced
  - Compact lightweight
  - Low vibration and noise levels
  - Controller integrated
  - Pincode (password protection)

### ELCTRONICALLY CONTROLLED

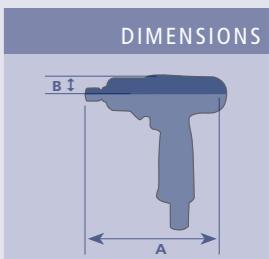

YBX-600TE in use

Tightening: OK

The YBX-600T and YBX-800T are Electronically Controlled battery impulse wrenches with integrated angle encoder for highly accurate torque tolerances. The shut-off is calculated over several impulses. The controller is integrated and enables counting, Poka Yoke.

## YBX-50A/YBX-50E Non shut-off

Type	Square / Hex drive	Bolt capacity mm	RPM	Torque Nm*	Weight kg	Dimensions A mm	Dimensions B mm	Vibration m/s²	Noise-level dB(A)

The Yokota testers have a static transducer, the specified torques are therefore to be used as a guidance only. In general the torque range will be lower in case of using lower airpressure, extension bars, torx or hexagon inset sockets, soft joints, etc.

Accessories for impulse wrenches on pages 18 & 19.

# Poka Yoke+ system

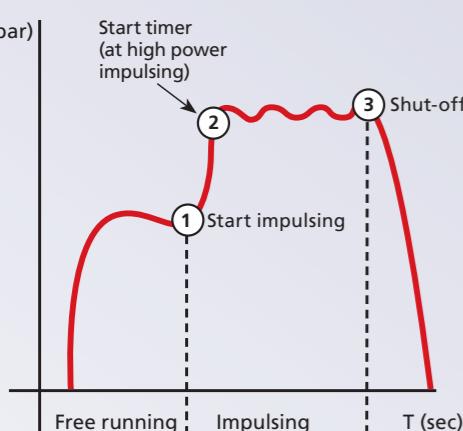

## Poka Yoke+: functioning principle

The system is controlled by measuring the air pressure at the inlet side of the air motor. This air pressure varies from free running to impulsing. By this measured air pressure the controller detects contact of the bolt head (point 2). Upon contact, the adjustable timer gives the shut-off signal (point 3). Adjustability of the timer takes care of adoption to either hard or soft joints. Similar, the controller detects double hits and trigger release before shut-off.

## Superior clampforces

In conventional shut-off tools point 2 is the shut-off point. Due to the above mentioned principle of the Poka Yoke+ controller, the relaxation is minimized and the correct torque and clampforce are achieved. The torque is adjusted at the impulse mechanism. In combination with the parameters in the controller YTC-3, a reliable shut-off is achieved.

The whole system is more accurate than shut-off or standard impulse wrenches.

## Controller YTC-3

### Controller YTC-3

- Power supply: 100 - 240V AC
- Input: 8
- Relay output: 4  
opening and shutting capacity:  
Max. DC-48W, AC-220VA)
- Output for solenoid valve:  
1(DC24V 2W)

### System features

- Group control
- Controlled shut-off
- Double tightening detection
- Interlock with assembly line
- Error judgement on trigger release
- Teach-in mode for programming
- Oil deterioration indication

# Yokota Multi Fastening Controller

The Yokota YETC-210/320 are developed for accurate tightening and fit in a Poke Yoke assembly process. The controller controls, measures, judges, counts and documents the tightening.

**YETC-210EA**

- Torque control
- One channel controller
- LAN version optional

**YETC-210EA4**

- Torque control
- Four channel controller not simultaneous
- LAN version optional (four I/P addresses)

**YETC-210ER**

- Torque control
- Angle monitoring version
- One channel controller
- LAN version optional

**YETC-320ER2L**

- Torque control
- Angle monitoring version
- Two channel controller, two tools can be operated simultaneous
- LAN standard, two IP addresses

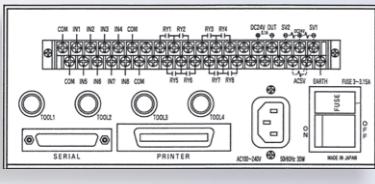

**YETC-320EA2**

- Torque control
- Two channel controller, two tools can be operated simultaneous
- Optional:**

  - LAN version (two I/P addresses)

**Back panel**

**Optional:**

- Ethernet (100 BASE-TX/10 BASA-T Autodetect function)
- Protocol: TCP/IP
- Connector: RJ-45

DIMENSIONS

## Electronic torque control & angle monitoring

Yokota Japan developed the system wrench with torque control more than 25 years ago, in order to tighten and shut-off the impulse wrench at the target torque with the features as insufficient or over torque, error detection, bolt counting, group control, production line management, data saving etc. Due to increased market demands for accuracy and error detection, Yokota integrated the additional angle monitoring function. By controlling the angle during the tightening process, all possible errors can be detected.

## Possible errors that can be detected

- Detection insufficient torque and over torque
- Detection friction coefficient out of tolerances
- Detection of too long / too short bolt
- Detection of seizure
- Detection of cross threaded threads
- Detection of crooked threads
- Detection of damaged threads
- Detection of double tightening
- Detection of blind holes

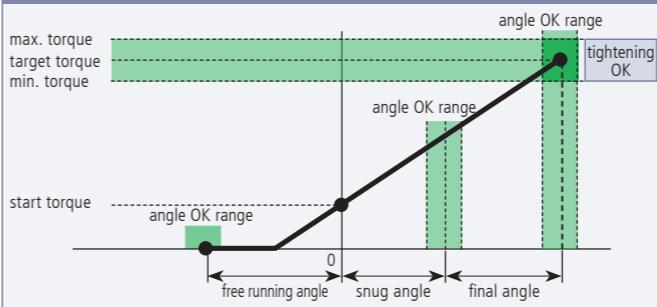

## Features

- Built in torque sensor, direct measurement
- Built in angle sensor
- compact angle sensor, 1° degree measurement
- Torque sensor non contact principle
- Torque & angle curve's on PC
- Easy torque adjustment on the tool
- Led or acoustic indication on the tool
- High efficiency air motor
- Shut-off by external solenoid valve

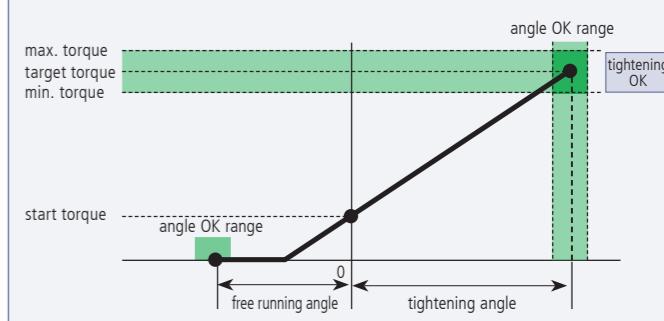

## Analysing software

## YETC-300ER2-L Torque control & angle monitoring including snug torque

## YETC-210 ER Torque Control & angle monitoring

For type	Ordernumber	Description
YBX-600T	7679-0000-01-00	100 - 240 V, Type BC200
YBX-600TA		Charging time: 20 minutes
YBX-800T		
YBX-800TA		

### Battery for YBX-50

For type	Ordernumber	Description
YBX-1	8530-3001-00-01	9,6 V / 2,0 Ah,
YBX-50		Type EB-9B, Ni-Cd

### Charger for YBX-50

For type	Ordernumber	Description
YBX-1	8530-4006-00-00	230 Volt, Type UC24YFA
YBX-50		Universal charger

## Toolable for system wrenches

### For the YETC-210 EA, YETC-210 EA4C, YETC-300 EA

Toolable	Ordernumber
7 meter	7642-1371-00-00
10 meter	7642-1400-00-00
12 meter	7642-1600-00-00
15 meter	7642-1908-01-19
Connection cable, 50 cm	7642-0908-01-38

### For the YETC-210ER, YETC-300R2-L

Toolable	Ordernumber
10 meter (included with YETC-210ER)	7681-0908 00 03
10 meter extension cable	7681-0908 00 06

1 for air &  
1 for tool cable

For type	Ordernumber
For all system wrenches	-MISCO10606

## Valves for system wrenches

### For all controller (2 Step valve set)

3/8"	YETC-2 SVD 3/8	-	-
1/2"	YETC-2SVD 1/2	-	-

## Joint Assy for YTC-3 controller

For type	Ordernumber
Joint Assy for 3/8 tools	7671-0077-00-97
Joint assy for 1/4 large tools	7671-0077-00-98
Joint assy for 1/4 standard tools	7671-0077-00-99

## Tool holder

For type	Ordernumber
YX-180 • YX-500 • YXS-500 • Y-40 • Y-61 • Y-T45 Y-T55 • YEF-45 • YEF-55 • YEX-120 YEX-150 • YED-60 YX-500S • YX-1400 • YXS-700 • YXS-1100 • Y-70 Y-90 • Y-130 • Y-T70 • Y-T90 • YEF-70 • YEF-90 YEX-300 • YEX-1400 • YBX-50	SKK

## Yokota torque measuring equipment

Yokota torque measuring equipment (YET-series) is especially designed to check and test the functioning and performance of impulse wrenches. All specified torque figures in this brochure are measured on a Yokota torque tester (YET series), with 0,63 MPa air pressure (dynamic). This is a static torque tester. Torque values may differ with other measuring equipment and/or joints (hard/soft).

For type	Range
YET-501C	5 - 50 Nm
YET-2001C	20 - 200 Nm
YET-5001C	100 - 500 Nm

Service sets containing: O-rings, back up rings and springs for impulse mechanisms for oilchange.
